Un livre coûte quinze euros.

1. Combien coûte un crayon? _____
2. Combien coûte un ordinateur? _____
3. Combien coûte un stylo? _____
4. Combien coûtent deux stylos? _____
5. Combien coûtent cinq cahiers? _____

I **Parlons!** With a partner, see how good you are with numbers. Each of you receives 25 points at the beginning. Whenever either of you makes a mistake counting, subtract one point. To begin, you start counting from zero and then suddenly stop. Your partner must continue counting and then he or she may stop at any time. You should be quick enough to pick up where your partner leaves off. Continue counting and alternating until you reach 50 or another previously designated number. The player with more points at the end wins.

J Look at the clippings and answer the questions.

1. What is the most expensive travel destination?

2. What is the cost of a trip to l'Algérie?

3. The letter "j" stands for the French word for days, which is *jours*. How many days in Algeria does this trip offer?
(En français, s'il te plaît.)
